

MenuControl 5 Revision History

This document contains details regarding improvements of the MenuControl 5 FileMaker plug-in.

MenuControl version 5.0.0.39 for Windows and Mac OS X

- Improved: This version of MenuControl is FileMaker 12 compatible¹
- Improved: Intel version of MenuComposer application included

¹*Important: FileMaker 11-12 will not load any Classic plug-ins on Mac OS X any longer, therefore only a Unicode plug-in version is FileMaker 11-12 compatible. This means that if you were previously using a Classic plug-in version, in order to use the Unicode plug-in version you will need to update your scripting. Please notice that only a plug-in function call style shell change, and all the menu codes shell remain.*
